

Thread

Thread

interface.lcd.MPS

```
graph BT; A[interface.lcd.MPS] --> B[Thread]; A --> C[Thread];
```

The diagram illustrates a class hierarchy. At the bottom, a box labeled 'interface.lcd.MPS' has two vertical lines extending upwards. These lines connect to a horizontal line, which then branches into two vertical lines. Each of these vertical lines terminates in an arrowhead pointing upwards to the bottom edge of a box labeled 'Thread'. This structure represents the 'interface.lcd.MPS' interface being implemented by two separate 'Thread' classes.
