

HTTPServer

Thread

setuptools.tests.server.MockServer

```
classDiagram
    class HTTPServer
    class Thread
    class MockServer["setuptools.tests.server.MockServer"]
    MockServer --|> HTTPServer
    MockServer --|> Thread
```

The diagram illustrates a class hierarchy. At the top, there are two parent classes: 'HTTPServer' and 'Thread'. Below them is a child class named 'setuptools.tests.server.MockServer'. A horizontal line connects the two parent classes, with vertical lines extending from its ends to the top of the child class box, indicating that 'MockServer' inherits from both 'HTTPServer' and 'Thread'.
