

QDialog

form_class

compile-on-the-fly.DemoImpl

```
classDiagram
    compile-on-the-fly.DemoImpl --> QDialog
    compile-on-the-fly.DemoImpl --> form_class
```

The diagram illustrates a class hierarchy where the `compile-on-the-fly.DemoImpl` class inherits from both the `QDialog` class and the `form_class` class. This is represented by two arrows originating from the `compile-on-the-fly.DemoImpl` box and pointing to the `QDialog` and `form_class` boxes respectively.
